Information Security Architecture & Controls Assessment

Ref: SEC-ASSESS-2026 · Internal Security Operations & Risk Assessment

Assessment of AES-256-GCM encrypted document custody, tenant isolation boundary testing, and ephemeral share lifetime controls.

Dynamic forensic watermarking and RAM-only streaming validations confirmed zero plaintext leakage to persistent storage.

Recommended remediation timelines and role-based access reviews are detailed in Appendix B.

Index Item	Classification	FY-26 Allocation	FY-27 Projected	Status
Capital Expenditure (CapEx)	Tier-1 Reserved	$14,200,000	$16,850,000	Approved
Operational Expenditure (OpEx)	Unrestricted	$8,450,000	$9,100,000	Pending
R&D / Infrastructure	Restricted	$5,100,000	$6,750,000	Approved
Regulatory & Compliance	Critical	$1,800,000	$2,200,000	Active Review
